The new and improved ToolSCAN 2.0 is an all-in-one, non-contact gage designed to measure Bodymaker Punches and Dies. The ToolSCAN 2.0 allows tool-room operators to more accurately size tools and better control front end performance.

ToolSCAN Capabilities

- Punch OD, Step and Rework taper
- Punch Profile Scan
- Die ID
- Punch and Die Roundness
- Necker tooling (option)

Specs and Features

- 0.38-micron / 0.000015-in repeatability
- 15-second punch and die measurements
- Non-contact LED micrometer technology
- Coming Soon: ToolCONTROL integration for tool tracking and process control
